

Finding $\rightarrow$ Experiment Cross-Reference

F#	Finding	Primary E	Supporting E	Role
F1	Predictor 13-prop R^2	E001	—	scaffold
F2	Flow curvature $R=0.51/0.9$	E004	—	scaffold
F3	Latent geometry	E003	E005, E007	scaffold
F4	Probe capacity (A/B)	E002	—	scaffold
F5	AdaLN-Zero gate collapse	E009	E008, E014, E015	diagnostic
F6	Sidechain perturbation	E011	—	scaffold
F7	wd $\times$ design (N=30)	E019	E014	diagnostic
F8	Joint-head AA collapse	E020, E026	E023	diagnostic
F9	Collapse scales with L	E026 follow-up	—	diagnostic
F10	Predictor:real gap closure	E028, E032	E029, E030, E031, E050	deliverable
F11	Per- t val parallelism	E043	E054	diagnostic
F12	Dense routing audit	E061	E059, E060	diagnostic
F13	Real CamSol per-length	E076	E066, E067, E072	deliverable
